

Rosneft Oil Company IFRS Results Q2 2016

August 17, 2016

Important Notice

Information herein has been prepared by the Company. The presented conclusions are based on the general information collected as of the date hereof and can be amended without any additional notice. The Company relies on the information obtained from the sources which it deems credible; however, it does not guarantee its accuracy or completeness.

These materials contain statements about future events and explanations representing a forecast of such events. Any assertion in these materials that is not a statement of historical fact is a forward-looking statement that involves known and unknown risks, uncertainties and other factors, which may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. We assume no obligations to update the forward-looking statements contained herein to reflect actual results, changes in assumptions or changes in factors affecting such statements.

This presentation does not constitute an offer to sell, or any solicitation of any offer to subscribe for or purchase any securities. It is understood that nothing in this report / presentation provides grounds for any contract or commitment whatsoever. The information herein should not for any purpose be deemed complete, accurate or impartial. The information herein is subject to verification, final formatting and modification. The contents hereof has not been verified by the Company. Accordingly, we did not and do not give on behalf of the Company, its shareholders, directors, officers or employees or any other person, any representations or warranties, either explicitly expressed or implied, as to the accuracy, completeness or objectivity of information or opinions contained in it. None of the directors of the Company, its shareholders, officers or employees or any other persons accepts any liability for any loss of any kind that may arise from any use of this presentation or its contents or otherwise arising in connection therewith.

Overview of Key Developments

Macroeconomic environment¹

Indicator	Q2 16	Q1 16	%	H1 16	H1 15	%
Urals, \$/bbl	43.8	32.2	36.2%	38.0	57.3	(33.7)%
Urals, th. RUB/bbl	2.89	2.40	20.2%	2.67	3.29	(18.9)%
Naphta, th. RUB/ton	25.4	22.8	11.1%	24.3	27.5	(11.8)%
Gasoil 0.1%, th. RUB/ton	26.7	22.9	16.6%	25.0	31.0	(19.2)%
Fuel oil 3.5%, th. RUB/t	13.4	10.3	29.0%	12.0	17.5	(31.5)%
Average exchange rate, RUB/\$	65.89	74.63	(11.7)%	70.26	57.40	22.4%
Inflation for the period (CPI), %	1.2%	2.1%		3.3%	8.5%	

Highlights

- Sale of 15% stake in Vankorneft to Indian ONGC Videsh Limited completed
- Sales and purchase agreement for 23.9% in Vankorneft and the shareholder agreement with the consortium of Indian investors
- Acquisition of a 23.33% stake in JV Petromonagas from Venezuelan PDVSA, increasing the Company's share to 40%
- Setting up JV with BP for development of perspective resources in the East and West Siberia
- Signing long-term contract with PetroVietnam Oil Corporation for the oil supplies in the amount of up to 96 mmt till 2040 signed
- Signing heads of agreement for the sale of a 20% stake in Verkhnechonskneftegaz to Beijing Enterprises

Key Operating Indicators

Indicator	Q2 2016	Q1 2016	%	H1 2016	H1 2015	%
Hydrocarbon production, incl. kboed	5,216	5,208	0.2%	5,212	5,175	0.7%
Crude oil and liquids production, kbpd	4,111	4,089	0.5%	4,100	4,129	(0.7)%
Gas production, kboepd	1,105	1,119	(1.3)%	1,112	1,046	6.3%
Refining throughput, mmt	22.45	22.61	(0.7)%	45.06	48.09	(6.3)%
Refining depth, %	71.2%	68.9%	+2.3 pp	70.0%	65.7%	+4.3 pp

Key Financial Indicators (RUB bln)

Indicator	Q2 2016	Q1 2016	%	H1 2016	H1 2015	%

Operating Results

Development Drilling

Drilling footage

th. m

New oil wells completed

units

- Directional wells
- Horizontal wells

Key achievements for H1 2016

- Increased footage in development drilling by 48% vs. H1 2015 with the share of in-house services in the total scope of work >50%
- All-time record for commissioning of new wells (1,218 wells). Increased commissioning of new horizontal wells (HW) >38% vs. H1 2015
- Reduced lean non-productive time resulted in the drilling rate increase by 19% as compared to H1 2015
- Efficient use of wellworks: > 56% growth in the number of new wells with multi-stage fracs; increase in the number of sidetracks by 12% with the incremental production of 0.8 mmt

Plans for 2016

- Increase of footage in development drilling by at least 30%
- Over 2,500 wells with ~30% of horizontal wells - new wells commissioning plan
- Further enhancement of drilling efficiency:
 - Q3 - managed pressure drilling at Yurubcheno-Tokhomskoye field
 - Q4 - implementation of a pilot project of a two-string horizontal well with multiframe in Yuganskneftegaz

Hydrocarbon Production

kboed

- ▶ Production growth in the greenfields and containment of natural production decline rates at brownfields through expansion of the development drilling program and successful application of modern well interventions
- ▶ **Northern Oil:** further development of Labagan (21 new wells commissioned), 60th million ton of oil produced at the fields of the subsidiary
- ▶ **Northern Chayvo:** commissioning of the 3rd (end of 2015), the 4th (Q1 2016) and the 5th (Q2 2016) wells
- ▶ **Uvat:** 3 new fields were brought into commercial production in 2015 – Protozanovskoye, Yuzhno-Gavrikovskoye, Malyk, and Zapadno-Epasskoye in Q1 2016
- ▶ **Gas production:** Launch in Q4 2015 of the 2nd stage of Novo-Urengoy gas and gas condensate treatment plant at Rospan in a test mode, increased production capacities in the northern tip of Chayvo and commissioning of a gas treatment at Barsukovskoye field of Purneftegaz facility in December 2015

Yugansk – Planned Oil Production Growth up to 68 mmt in the Mid-Term

Average daily production in 2015-2019

- YNG provides for 31% of oil and gas condensate production of the Company
- Current recoverable reserves of oil and gas condensate in the amount of 2.7 bln tons allow raising the output up to 68 mmtpa in the mid-term via increased drilling and wellworks
- From July 2015 YNG demonstrates sustainable production growth
- Higher amount of development drilling, commissioning of new wells, sidetracking and other wellworks
- High potential for hard-to-recover reserves development via using efficient advanced technologies (~10 mmt by 2020)

Dynamics of daily production in 2014-2016

Progress of Projects in Nenets Autonomous Area

Labagan

- ▶ Commercial development started in Q3 2015
- ▶ In June 2016 the average daily production reached more than 2.6 ktpd
- ▶ The output is expected to reach ~1 mmtoe in 2016
- ▶ 35 mmtoe / 241 mmboe 3P PRMS reserves as of December 31, 2015
- ▶ 21 wells launched in 2015. In H1 2016, 21 wells were additionally commissioned with over 1.2 ktpd average daily total production

Naul

- ▶ Commercial development is to start in Q4 2016
- ▶ Construction in progress of 2 pads, pressure pipeline (20 km) and power center site
- ▶ The output is expected at ~0.4 mmtoe in 2017
- ▶ 36 mmtoe / 239 mmboe 3P PRMS reserves as of December 31, 2015
- ▶ Drilling of 6 wells planned for 2016, incl. 2 oil wells with average initial production rates of ca.100 tpd

Progress in Key Projects in YaNAO and North of Krasnoyarsk Region

Suzun

- ▶ Field commissioning is scheduled for September 2016
- ▶ Plateau is expected at ~4.5 mmt of oil in 2017
- ▶ 75 mmtoe / 570 mmboe 3P PRMS reserves as of December 31, 2015
- ▶ 47 wells drilled as part of FFD, construction of the first start-up complex CPF and Suzun-Vankor oil pipeline being completed; field infrastructure setup and construction of facilities in progress as of June 30, 2016

East-Messoyakha¹

- ▶ Field commissioning is scheduled for September 2016
- ▶ Production growth over 5 mmt of oil beyond 2018
- ▶ 212 mmtoe / 1,461 mmboe of 3P PRMS reserves as of December 31, 2015
- ▶ As part of FFD 46 wells drilled as of June 30, 2016, construction of pressure pipeline for connection with main oil pipeline Zapolyarye – Purpe completed, field infrastructure setup, construction of main facilities in progress: CPF, GTTP, field support base, acceptance point,

Upstream Portfolio Optimization

Vankor

Partner: ONGC (15%, to 26%), pool of Indian investors (up to 23.9%)

VCNG

Partners: Beijing Enterprises (20%)

Taas-Yuryakh

Partners: BP (20%), consortium of Indian investors (29.9%)

Polar Lights

Sale of 50% stake

Russkoe

Sale of up to 49% stake

Tagulskoe

Sale of up to 49% stake

YuTM:

Sale of up to 49% stake

Attracting partners in the current projects:

■ Vankorneft

- Transaction with the Indian ONGC on the sale of 15% stake closed, MoU on cooperation assuming increase ONGC's stake to 26% signed;
- SPA for 23.9% with the group of Indian companies signed

■ OOO Taas-Yuryakh Neftegazodobycha

- Deal on sale of 20% stake to BP closed;
- SPA for 29.9% stake with the group of Indian companies signed

■ PAO Verkhnechonskneftegaz

- Heads of agreement for potential sale of a 20% stake in PAO Verkhnechonskneftegaz to Beijing Enterprises signed

Attracting partners to new projects in order to share risks, financing and transfer the technology for the most efficient approach to the fields development:

- Sale up to 49% in YuTM, Russkoye and Tagul fields

Optimizing low margin assets:

- Sale of 50% stake in Polar Lights closed

Gas Business: organic production growth and efficient monetization

Key achievements in H1 2016

- ▶ 7% increase in gas production, mainly as a result of gas treatment facilities launch at Rospan at the end of 2015 and Purneftegaz, and commissioning of 1 new wells in the northern tip of Chayvo in H2 2016 and 1 new well in H1 2016
- ▶ Improvement of APG utilization up to 90% in H1 2016 (87% in H1 2015) mostly due to the launch of gas treatment facilities and transition to using APG instead of natural gas for power generation in RN-Vankor
- ▶ supplies under the long-term contract with INTER RAO, the largest consumer in Rosneft portfolio (ca. 30 bcm per year) started from January 1, 2016. All gas supply requests from the counterparties were fully met. Additionally, at SPIMEX ca. 1.5 bcm of gas was sold in H1 2016
- ▶ Gas transportation tariffs for independent producers indexation planned for 2016 in the amount of 2% would not take place due to lack of conditions for such increase. This will positively influence on gas sales profitability

Gas production

Gas sales in Russia

Processing and production of motor fuel

Key achievements in Q2 2016

- Light products yield in Q2 2016 increased to 56.2%, refining depth to 71.2%
- 47% yoy increase in production of Euro-5 motor fuels
- Construction of catalytic cracking unit at Kuybyshev refinery completed
- Complex testing of MTBE equipment at Kuybyshev refinery finished

Status of Refineries Upgrade Program delivery

Plans for 2016

- Increased production of high-margin petroleum products by reducing the production of fuel oil
- Implementation of the import substitution program in the area of chemicals, catalysts and additives to motor fuels
- Further construction of facilities within the refinery modernization program
- Implementation of the program for efficiency improvement and maintaining assets

Crude Oil and Petroleum Product Sales

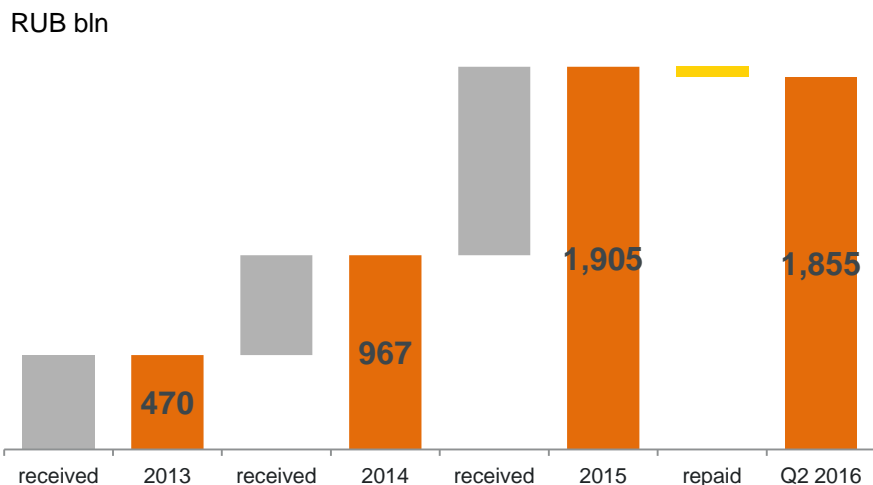

Netbacks of the main oil monetization channels

Oil monetization structure (Q2 2016)¹

Profile of repayments for long term contacts

- Increase high-margin oil supplies eastwards by 11.5% to 10.7 mmt in Q2 2016
- Signing an agreement with Vietnamese PV Oil for supplies of up to 96 mmt in 2017-2040 signed
- Extension of the contract with PKN Orlen for crude supplies to the refinery in the Czech Republic with monthly supply volume from 230 to 440 kt
- Signing new contract for crude supplies via ESPO to ChemChina in the amount of 2.4 mmt from August 2016 to July 2017

Note: (1) in % of total oil supplies

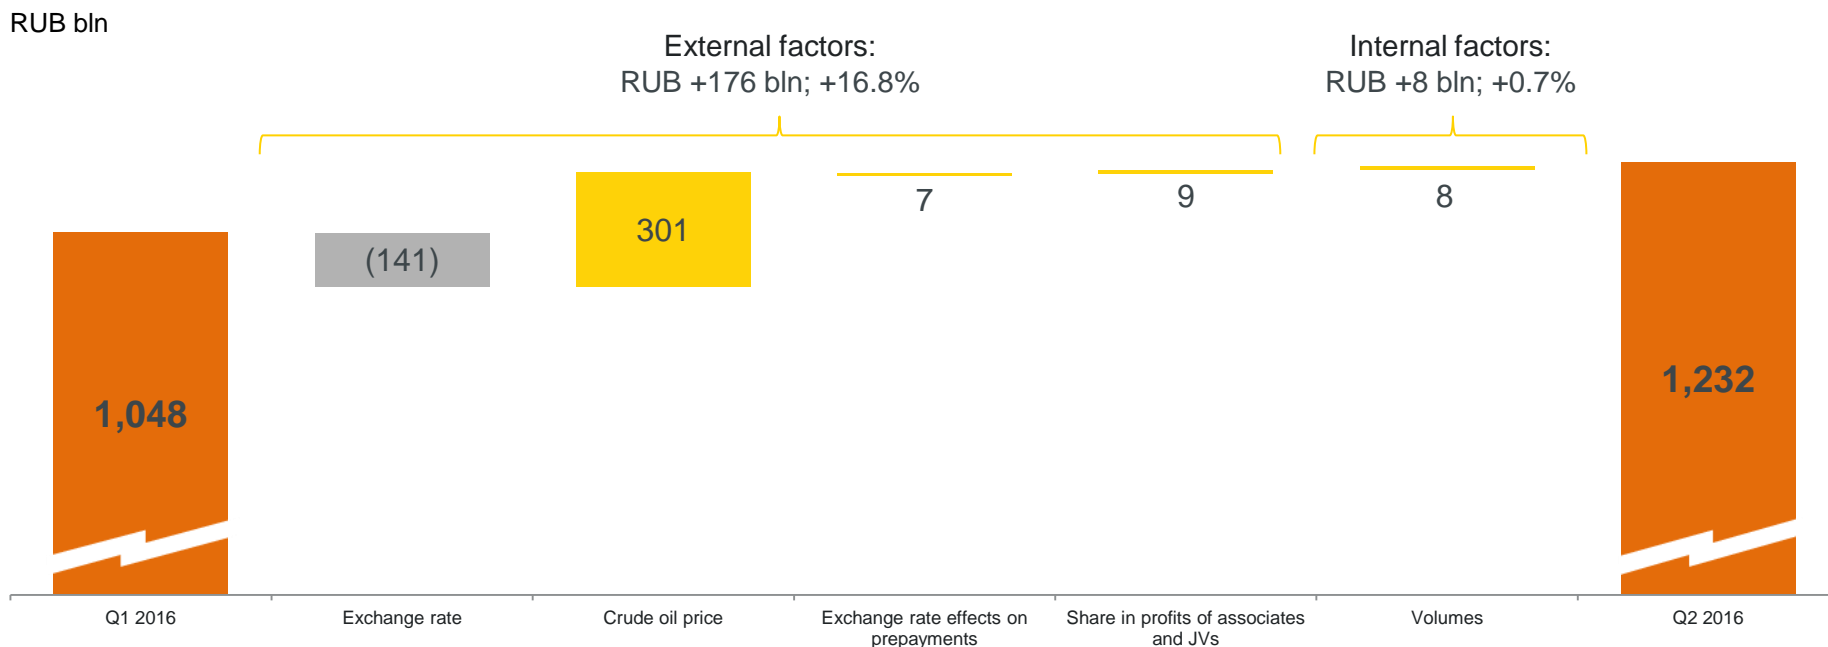

Financial Results

Revenue

Q2 2016 vs Q1 2016

- Growth in oil prices by 20% in RUB terms
- Increase in volumes of crude oil and petroleum products sales to foreign countries (excl CIS) by 4.6% qoq
- Higher efficiency of sales channels

Operating Costs Dynamics

Lifting costs

Refining costs in Russia

Transportation costs

Producer price index (annual basis)

EBITDA and Net Income

EBITDA in Q2 2016 vs Q1 2016

RUB bln

Net income in Q2 2016 vs Q1 2016

RUB bln

EBITDA and Net Income Compared to Global Peers

EBITDA in USD terms

Q2 2016 vs Q1 2016

H1 2016 vs H1 2015

Net income in Q2 2016

- One of the best EBITDA dynamic in the sector for both Q2 2016 and H1 2016 due to efficient cost control, efficiency improvement and weaker RUB
- High level of net income compared to losses of most of international peers¹ for Q2 2016

Capex and production

Upstream Capex in H1 2016¹: benchmarking

- ▶ **Increase in Upstream H1 2016 CAPEX (+33%) YoY**, focusing on meeting the strategic goals in hydrocarbon production growth:
 - Intensification in development drilling
 - start of active development phase of new major oil and gas production projects (Suzun, Srednebotuobinskoye, Yurubcheno-Tokhomskoye)

- ▶ **Investments in the oil refining and petrochemical plants** are mostly focusing on **commissioning of crackers** at Syzran, Kyubyshev and Novokyubyshev refineries

- ▶ **Confident leadership in unit Capex in Upstream** with build-up of the investment program as compared with the key local and international players:
 - H1 2016: \$4.5/boe
 - expected level in 2016: ~\$6/boe

Note: (1) Rosneft, Statoil – data for H1 2016, Petrobras, Lukoil, Gazprom Neft – data for Q1 2016; all other companies – data for 2015.

Free Cash Flow

Free Cash Flow

FCF in H1 2016: benchmarking (majors)

- As a result of complicated marco environment, increased fiscal burden and growing investments the free cash flow reduced by 59% to RUB 141 bln in H1 2016
- Rosneft retains its leadership in the global oil and gas sector in terms of the free cash flow generation
- In H1 2016 this indicator was at \$3/boe as compared to the negative indicators demonstrated by majority of competitors
- Substantial net debt cut by the Company in comparison to jump in financial burden of the global peer group

Net debt

Note: (1) incl. ExxonMobil, Chevron, Shell, BP, Statoil

Financial Stability

Debt and net debt dynamics

► Credit portfolio management:

- Over the last 12 months, total debt decreased by 15.8%, net debt – by 41%
- In 2Q 2016, total debt decreased by 3.8%³, net debt was down by 2.1%³

► Liquidity:

- Sustaining significant liquid assets amount⁴ – more than \$22 bln¹ at the end of Q2 2016
- Smooth debt repayment schedule, no peak repayments

Debt maturity profile

Debt profile by currency⁵

Notes: (1) At the exchange rate of the US dollar set by the RF Central Bank at the end of the reporting period; (2) At the exchange rates and interest rates as of 30.06.2016 (excluding future interest accrued, but taking into account future lease payments); (3) Compared with 2016; (4) Including free cash on the accounts, short-term financial assets and a portion of long-term deposits; (5) As of June 30, 2016.

Appendix

Revenues

H1 2016 vs 1H 2015

- ▶ Decline in oil prices by 18.9% in RUB terms
- ▶ Increase in the oil sales volumes by 7.7%, including export to foreign countries (excl CIS) by 8.7%
- ▶ Gas sales increased by 18.7% due to volume and price growth

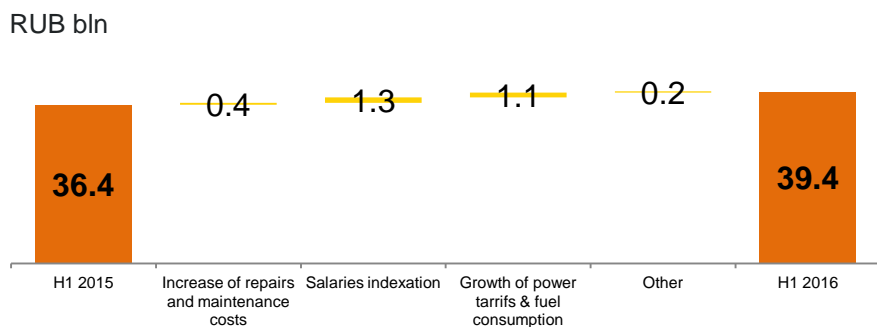

Costs Dynamics H1 2016 vs H1 2015

Lifting costs

Refining costs in Russia

Transportation costs

- ▶ Growing electricity costs (increased tariffs and watercut) and higher HC lifting expenses were partially offset by the planned reduction in wellwork costs and current workovers and power equipment maintenance costs coupled with the drilling program expansion
- ▶ Growth in refining expenses because of a change in the structure of products, growth of natural monopolies' tariffs and salaries indexation
- ▶ Growth in Transneft crude transportation tariffs through main pipelines by 5.76% and changes in the network tariffs effective from January 1, 2016
- ▶ Indexation in Transneft products transportation tariffs for most destinations by 12% effective from January 1, 2016
- ▶ 9% growth in Russian Railways tariffs, charges and payments for cargo transportation and infrastructure utilization vs. 2015
- ▶ 7.8% CPI growth, 3.9% PPI growth YoY

EBITDA and Net Income

EBITDA – 1H 2016 vs. 1H 2015

Net income H1 2016 vs. H1 2015

FX Exchange Risk Hedge

	Q2 2016, RUB bln			H1 2016, RUB bln

Export Duty Lag

Note: The effect of the time lag in the establishment of import duties on the Company's EBITDA stands apart on this slide, i.e. (unlike the factor analysis) it is calculated for certain quarters and based on the volumes and the USD average exchange rate of respective quarter

Financial Costs, RUB bln

	Indicator	Q2 16	Q1 16	%	H1 16	H1 15	%
1.	Interest accrued ¹	34	36	(5.6)%	70	72	(2.8)%
2.	Paid interest	29	42	(31.0)%	71	67	6.0%
3.	Change of interest payable (1-2)	5	(6)	–	(1)	5	–
4.	Capitalized interest ²	14	15	(6.7)%	29	22	31.8%
5.	Net (income)/loss from operations with c financial derivatives ³	(2)	2	–	–	62	–
6.	Increase of provisions as a result of time passing	4	4	–	8	6	33.3%
7.	Interest for using cash payable under advance payment contracts	21	24	(12.5)%	45	22	104.5%
8.	Other finance costs	1	1	–	2	1	100.0%
9.	Total financial costs (1-4+5+6+7+8)	44	52	(15.4)%	96	141	(31.9)%

Note: (1) Including interest charged on credits and loans, promissory notes, ruble bonds and Eurobonds; (2) Capital costs shall be capitalized in accordance with IAS 23 standard Borrowing Costs. Capitalization rate is calculated by dividing the interest costs for borrowings related to capital expenditures by the average balance of loans. Capitalized interest shall be calculated by multiplying average balance of construction in progress by capitalization rate; (3) Net-effect changes in operations with financial derivatives resulted from fluctuations of currency component of the deals

EBITDA and Net Income Sensitivity

Urals price

RUB bln -9.1 \$/bbl +9.1 \$/bbl

EBITDA

Net income

Exchange rate

RUB bln -8.8 RUB/\$ +8.8 RUB/\$

EBITDA

Net income

- ▶ Average Urals price in Q2 2016 amounted to \$43.4/bbl. If the average price of the said period had retained at \$35/bbl, EBITDA would have reduced by RUB 80 bln, including the negative effect of the deferred duty in the amount of minus RUB 47 bln.
- ▶ Average US dollar exchange rate in Q2 2016 was RUB 65.9/\$. If average ruble exchange rate had weakened to RUB75/\$ within the said period, EBITDA would have gone up by RUB 59 bln.

Questions and Answers
